PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 2+ years of hands-on experience building enterprise-grade .NET and Angular applications. Specialized in multi-tenant SaaS platforms, clean architecture, and regulatory compliance integrations including ZATCA e-invoicing for Saudi Arabia. Proven expertise across the full development lifecycle — from RESTful API design with ASP.NET Core and Entity Framework Core, to reactive Angular front-ends using NgRx and Signals. Delivered production systems with ABP Framework, OpenIddict (OAuth2/OpenID Connect), and DevExpress in high-complexity, multi-organization environments. Committed to scalable architecture, secure systems design, performance optimization, and Agile delivery.

PROFESSIONAL EXPERIENCE

Full Stack Developer | MMB Logistics and Consulting Services

May 2026 – Present

Logistics & Consulting Technology Solutions · Egypt

- Developing full-stack logistics management features using ASP.NET Core and Angular, supporting end-to-end shipment tracking and consulting workflows
- Designing RESTful APIs and relational data models to integrate transportation operations with consulting service modules, applying Clean Architecture principles
- Collaborating with cross-functional teams to deliver scalable web solutions aligned with logistics industry requirements and business goals

Full Stack Developer | DataBand IT Solutions

Feb 2025 – May 2026

Enterprise Software Development · Egypt

- Architected multi-tenant SaaS infrastructure using ABP Framework and Clean Architecture, enabling complete data isolation per tenant and rapid onboarding of new enterprise clients without code changes
- Designed and delivered production-grade RESTful APIs with ASP.NET Core and Entity Framework Core, supporting concurrent multi-tenant workloads across 5+ organizations
- Built 2+ full-stack enterprise web applications integrating Angular front-ends with .NET back-ends, from requirements gathering through production deployment on Azure DevOps CI/CD pipelines
- Implemented secure OAuth2/OpenID Connect authentication and role-based access control using OpenIddict, supporting multiple user hierarchies across laboratory organizations
- Delivered LIMS enterprise platform using ABP Framework and DevExpress components, providing advanced data grids, reporting, and role-based workflows for quality laboratory management
- Participated in Agile/Scrum ceremonies — sprint planning, code reviews, and retrospectives — consistently delivering features on schedule with high code quality

Front-End Developer (Part-Time) | SH-Prosoft

Aug 2025 – Feb 2026

Web Application Development · Egypt

- Engineered responsive Angular applications using PrimeNG and Angular Material, improving component reusability across 3+ feature modules and reducing UI inconsistencies
- Architected reactive state management using NgRx and Angular Signals, improving data-flow predictability and eliminating redundant API calls through unidirectional data patterns
- Delivered pixel-perfect, mobile-first UI components with Tailwind CSS and Bootstrap, ensuring cross-browser compatibility and consistent user experience across devices

KEY PROJECTS

LIMS — Quality Laboratory Management System | ABP Framework · ASP.NET Core · Angular · OpenIddict · DevExpress

- Architected enterprise multi-tenant SaaS application using ABP Framework, supporting complete data isolation across multiple laboratory organizations with zero cross-tenant data leakage

- Implemented OAuth2/OpenID Connect authentication via OpenIddict, securing access for multiple user hierarchy levels and role-based permissions across tenants
- Developed Angular front-end with DevExpress advanced data grids, reporting dashboards, and audit workflows — reducing manual reporting effort for lab staff
- Designed isolated database architecture ensuring full GDPR-aligned tenant data separation and security compliance

ZATCA E-Invoice Integration System | ASP.NET Core · RESTful APIs · XML/JSON · Cryptographic Signing

- Developed RESTful API integration with Saudi Arabia's ZATCA Fatoora platform, achieving 100% Phase 2 compliance for electronic invoice submission and clearance
- Implemented invoice generation, validation, and cryptographic signing per ZATCA Phase 2 cryptographic requirements, eliminating manual compliance errors
- Built QR code generation and XML/JSON invoice formatting compliant with Saudi tax regulations, supporting invoice lifecycle management from generation through reporting
- Ensured full compliance with Saudi Arabia's e-invoicing mandate, enabling clients to meet tax reporting and auditing obligations without manual intervention

TECHNICAL SKILLS

Back-End	C# .NET / ASP.NET Core Entity Framework Core Dapper ADO.NET ABP Framework OpenIddict xUnit Swagger/OpenAPI
Front-End	Angular TypeScript JavaScript (ES2024) RxJS NgRx Angular Signals PrimeNG Angular Material Tailwind CSS Bootstrap
Databases	SQL Server PostgreSQL MongoDB Redis (Caching)
DevOps & Cloud	Azure DevOps Docker Git GitHub CI/CD Pipelines
Architecture	Clean Architecture MVC Multi-Tenant SaaS Microservices SOLID Principles REST API Design OAuth2 / OpenID Connect Domain-Driven Design
Integrations	RabbitMQ SignalR Hangfire DevExpress ZATCA / Fatoora API

PROFESSIONAL TRAINING

Full Stack .NET & Angular Program | Information Technology Institute (ITI)

May 2024 – Oct 2024

- Intensive program covering .NET, Angular, RESTful API design, clean architecture, and full-stack application development
- Completed hands-on projects integrating ASP.NET Core back-ends with Angular front-ends across multiple real-world scenarios

Software Engineering Fundamentals | Information Technology Institute (ITI)

Nov 2023 – Mar 2024

- Gained foundation in software engineering principles: system design, OOP, debugging strategies, and collaborative development workflows

EDUCATION

Bachelor of Law | Aswan University, Egypt

Sep 2019 – May 2023

LANGUAGES

Arabic — Native

English — Professional Working Proficiency
